## Profile – Graphic Designer

I am BA Graphic Design (2:1) graduate from Arts University Bournemouth with a strong interest in motion graphics, including Kinetic Typography and 2D Animations, as well as using Adobe After Effects. I have developed a strong visual portfolio whilst at University and Freelancing. The creative journey can be seen at [bartekwiatrek.co.uk](http://bartekwiatrek.co.uk).

As a Freelancer, I had worked with a variety of clients, where I have been building a strong relationship with a customer via constant communication and feedback. The experience engaged me to become less reliable solely on my skills but instead be successful and productive through the engagement with a client, and now I am looking for a Junior Graphic Designer roles within Agency.

## Education/Awards

### • September 2022 – Present – Arts University Bournemouth – Master of Arts in Graphic Design:

#### • Masters Part One and Two – Plan

During the Masters One and Two Project, I plan to delve into the world of Video Games, as using Graphic Design, I want to inform and engage the audience about this new form of media. I want to compare and explore the correlation between video games, movies, books etc., as part of the research to demonstrate the unique traits of video games. Masters One is going to be about exploring the territory with a set of small projects and preparing the bases for Masters Two, which will indulge and embrace Graphic Design approach on the topic.

### • June 2020 – Arts University Bournemouth – Bachelor of Arts with Honours in Graphic Design:

#### • Moving Pictures – Life Brief

I had developed a visual animation based on the given transcript, using Adobe After Effects. I worked closely with a freelance Graphic Designer maintaining communication, and receiving regular updates on the project. I had used problem-solving skills when sinking animation with a transcript to progress further with a brief.

### • June 2017 – Richard Taunton Sixth Form College – Graphic Communication/Photography:

- A Level Photography – C Grade
- A Level Graphic Communication – C Grade
- A Level ICT – D Grade

## Creative Skills

## Work Experience

---

- **June 2022 – Present – Sales Consultant at Next**

- At Next, I was responsible for bringing in a delivery of stock to the store and preparing it to be ready for a shop floor and stockroom. In addition, there were occasional responsibilities of preparing parcels for distribution and preparing stock to be sent back to the warehouse.

**Assets Include:**

- Bring in of stock delivery to the store
- Processing stock to be ready for shop floor and stockroom
- Preparing stock for return to the warehouse
- Preparing stock for sale events
- Bring in of parcels and preparing them for distribution

- **September 2021 – February 2022 – InDesign Specialist at Chichester Life**

- I had worked on developing a layout for the Community Magazine using Adobe InDesign. I have developed a strong understanding of layout and Adobe InDesign, previously learned whilst at the University. In addition, I had worked on different animations as the title sequence for a video montage and the seasonal event. The work flow of the project can be seen at [bartekwiatrek.co.uk](http://bartekwiatrek.co.uk).

**Assets Include:**

- Magazine Layout Design
- Magazine Cover Design
- Brochure Design and Marketing Materials
- Managing and Creating Video Templates/Montages
- Preparing Promotional Animations
- Title Sequences for a Video Montage

- **September 2020 – August 2021 – Freelance Graphic Designer**

- I had worked with a variety of clients on video production using Adobe Premiere Pro and social media-based designs using Adobe Photoshop. I developed coherent visuals for their media channels while working closely with a client to meet a brief. I had developed excellent communication skill, working with clients to understand and translate their needs into the design.

**Assets Include:**

- Copy-writing
- Managing and Creating Video Templates/Montages
- Creating Social Media Based Designs
- Animation Based Designs and Title Sequences
- Business Card
- Posters
- Banners for Web

## Hobbies and Interests

---

**Game Development:** As a hobby to maintain my creative abilities, I decided to develop a simple but very own game using Unreal Engine. It's a simple 2D platform game that features the Mario style gameplay mechanics.

**Video Game Modding:** In the meantime, I have had learned a GTK Radiant software, where I developed several maps for Star Wars Jedi Knight: Jedi Academy video game. The game was part of my childhood, and I was always interested in how the game worked from a technical standpoint.

**Side Projects:** In addition to my vast interest in art, I am always into setting myself a set of side projects. I worked on dozens bizarre animation and posters as a comedic relief.
